Conclusion

Conclusion:

Four areas stand out from this report;

1. A need to provide accessible information that promotes both existing and new events and activities.
2. More organised activities / events that utilise existing space / parks to promote and encouraging participation and a sense of shared ownership.
3. Personal support that is less formal and easy to access in both areas of wellbeing and career pathways.
4. That digital media is part of young peoples lives.

The majority of young people believe what they do out of school is important.
