

Health and Wellbeing Board Development

Ben Brannan and Diane Lee

Barnsley's Assets

Communication of Key Public Health messages is effective and there are examples of where communication is having a positive impact.

A clear vision for improving health and wellbeing and tackling health inequalities

We work effectively with local communities to understand the needs and assets in those communities, working with them to find solutions.

Frontline staff and commissioned services across the full range of our functions are playing a role in improving and protecting health and wellbeing.

Joint Strategic Needs Assessment (JSNA) and ICOF are well developed which gives us a good understanding of local need

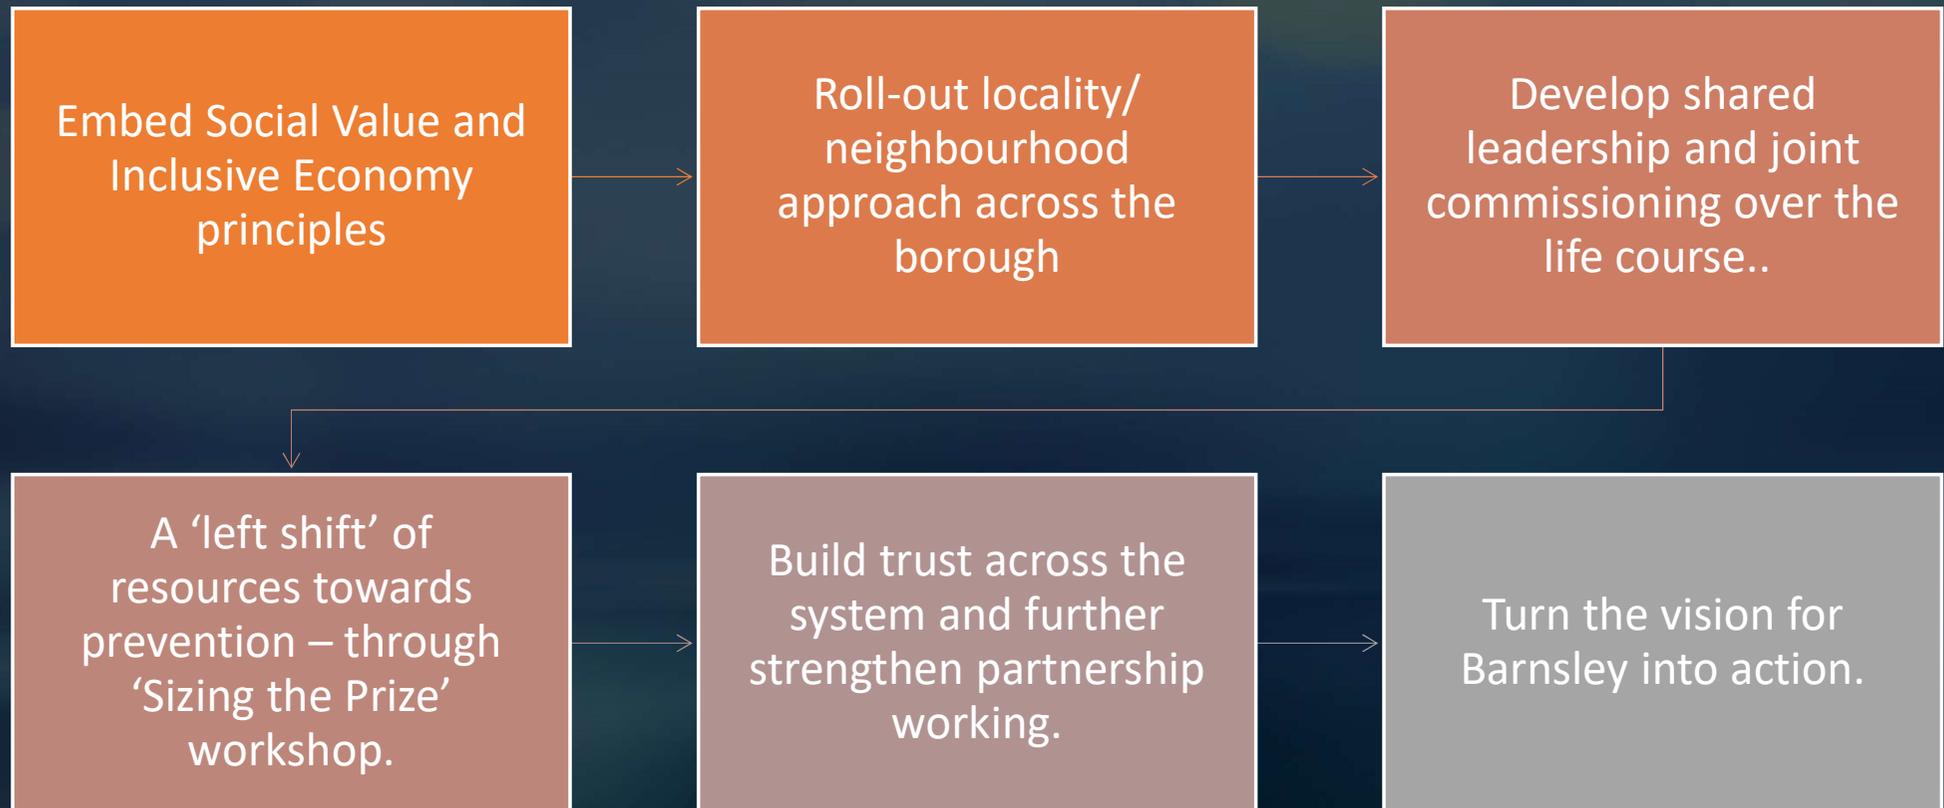

Alignment of Area Councils and Integrated Wellbeing Teams;

Opportunities to drive improvements:

- Covid 19 has improved partnership working within Barnsley – we need to use these conversations and strengthened relationships to drive change and build trust; need to ensure these relationships are cemented and built into governance arrangements and delivery structures.
- Vulnerability Index
- Civic pride and will to improve things is incredibly strong in Barnsley.
- Mental Health Partnership
- Health and Wellbeing Strategy Refresh

Actions we can take

What we're aiming for

- The ultimate goal is to increase healthy life expectancy and narrow the life expectancy (and healthy life expectancy) gap across the borough, by moving those with lowest life expectancy up.
- We can measure this through existing metrics that are captured within the Joint Strategic Needs Assessment, Integrated Care Outcomes Framework and Public Health Outcomes Framework such as:
 - Poverty
 - Employment levels,
 - Housing Conditions, and
 - School readiness/ educational attainment
- Ensuring the right support is in the right place;
- Improved mental health across the borough (through the work of the MHP).

Recommendations

- A cross-system (including the Integrated Care System) workshop is held at an appropriate time, which focusses on how we can achieve greater value for money in Barnsley.
- Board members actively contribute to the development and delivery of the updated Joint Health and Wellbeing Strategy; that they take ownership for delivering on the strategy and advocate the work of the Board within their own organisations and at partnership meetings (as per the updated Terms of Reference).
- The Strategy is translated into clear and measurable outcomes and the Board hold the system to account in achieving these outcomes.
- Update and agree a 'report template' for all reports to the Health and Wellbeing Board. Template should include the following sections:
 - Questions for the Board
 - Recommendations and Actions for the Board (actions should be specific, tangible & measurable)
 - Which outcomes of the refreshed strategy the report aligns with.
