

## **Report of the Data Protection Officer**

**AUDIT AND GOVERNANCE COMMITTEE – 1<sup>st</sup> JUNE 2022**

### **DATA PROTECTION OFFICER UPDATE REPORT**

#### **1. Purpose of the report**

- 1.1 This report highlights the key areas of work of the Council's Data Protection Officer (DPO) to provide the Committee with information and assurances regarding the Council's compliance with the Data Protection Act 2018 and UK GDPR.

#### **2. Recommendation**

- 2.1 **It is recommended that the Committee consider the report and the information and assurances within it and receive a further update in 6 months' time to contribute to wider assurances as part of the Annual Governance Review process.**

#### **3. Background**

- 3.1 The Council is required to appoint a DPO under the General Data Protection Regulations and Data Protection Act 2018. The key aspect of this role is to provide the Council with independent assurance regarding compliance with the data protection law.

#### **4. DPO Activities and Assurance**

- 4.1 The DPO has regular meetings with officers from the Information Governance Team and the Senior Information Risk Officer (SIRO) and reports to the Information Governance Board. The DPO also undertakes specific assurance reviews to support that independent assurance.
- 4.2 Overall, recent activity and general oversight, continues to provide a generally positive picture regarding compliance with UK GDPR. To support that, the change in emphasis of the Information Governance Board provides a clearer focus on compliance and awareness. Strategic issues are escalated to the Senior Management Team as required thus ensuring data protection and general information governance matters are considered at the highest level.
- 4.3 The Information Governance Team provides regular reminders to all staff regarding various aspects of information governance, as well as mandatory training through the POD online training system. Such mandatory training has covered incident management, protecting personal data, subject access requests and a general UK GDPR reminder. It is however important to highlight that the take-up of mandatory training in various areas of the Council could be improved. This is an area of particular focus of the Information Governance Board.

- 4.4 Compliance with the statutory timescales for responding to FOI and SAR requests is very high which reflects the work undertaken to support teams receiving such requests and the diligence of the Customer Requests and Information Governance Teams.
- 4.5 Recent phishing campaigns have also highlighted improved awareness amongst staff to spot irregular emails and report them to IT. This threat is further mitigated by the comprehensive technical framework in place to prevent malicious emails and general cyber attacks entering the Council's network and systems. However, it is acknowledged that whilst employee awareness is good and good technical measures are in place, attacks from phishing and whaling remain a high risk to the Council and rely on staff being constantly alert to the risk.
- 4.6 Significant work continues to be undertaken around cyber and IT security generally, with regular phishing and password testing exercises to constantly ensure high levels of awareness and security. It remains a priority of the Information Governance Team to constantly reduce the number of data incidents and help improve the timeliness of management actions to minimise the risk of incidents recurring. There has been a steady reduction in incidents over the last 3 years. An analysis of data incidents is presented to the Information Governance Board for monitoring.
- 4.6 A review is currently underway of how subject access requests are managed. As stated above, responding to these in the required timescales is consistently very good, but there are opportunities to improve the efficiency of the process. Allied to this is a further review regarding the efficacy of how redactions are identified and actioned as part of the SAR (and FOI) processes. These reviews will further strengthen the Council's ability to continue to meet all the required timescales but also improve internal efficiency.
- 4.7 The DPO is regularly contacted to provide advice and guidance on data protection issues and particularly where the Information Commissioner's Office is involved in a matter.
- 4.8 The DPO undertakes or commissions independent reviews of various aspects of information governance. Those planned for 2022/23 are:

DPO Assurance:

- CCTV review
- Incident management
- Law Enforcement
- Data Protection Impact Assessment reviews and compliance
- Information sharing agreements

Internal Audit:

- Data retention / records management
- CFIT follow-up

- 4.9 The DPO and Internal Audit will continue to monitor management's response to the issues raised and conduct further independent reviews and audits on a continuous rolling basis. These will be reported to the Information Governance Board and the Audit and Governance Committee.
- 4.10 As a key source of assurance for the Committee and to properly discharge the responsibilities of the DPO, the role requires independence from management, unfettered access to senior management and access to the necessary resources. These key requirements are in place.
- 4.11 As stated, overall, the Committee can be assured that whilst there will inevitably be data and information incidents there is a robust and comprehensive suite of policies and guidance in place supported by a strong and committed Information Governance Team. The joint working and liaison between the DPO, Information Governance, the SIRO, Customer Requests and Legal Services provides a robust basis to guide the Council to ensuring that data protection responsibilities are understood and complied with as effectively as is reasonably possible.
